

COM2501 SCIENTIFIC PROGRAMMING PROJECT 2

MACHINE LEARNING PROJECT

- Find a dataset
- Apply machine learning algorithms
 - You are free to use any programming language
 - Python, R, C++, MATLAB, Octave, ...
- Write a conference paper
 - Conference template and sample papers had been uploaded to ekampus.ankara.edu.tr

Maximum 2 students can work together in the project.

Project presentations are going to be held in **the last week of the semester!** Presentation hours are going to be announced later!

You **MUST** zip your **presentation files** and your **conference papers** and upload to the system till the last day of the semester.

Students working together on the same project are **required** to upload their files **individually**.
