

COM2501 SCIENTIFIC PROGRAMMING PROJECT 1

DIGITAL IMAGE PROCESSING PROJECT

- In this project, you are expected to develop a digital image processing application with a **graphical user interface (GUI)**.
 - You can develop an application as you want. The **only condition** is that it **must** be related to digital image processing.
- **Any** programming language can be used.
 - MATLAB, Octave, R, Python, C++, ...

Maximum 2 students can work together in the project.

Project presentations are going to be held in the **13th week** of the semester! Presentation hours are going to be announced later!

You **MUST** zip your **presentation files** and your **codes**, and upload to the system till the last day of the semester.

Students working together on the same project are **required** to upload their files **individually**.
